NOTE: (See 37 CFR 1.116 and 41.33(a)).			(570) 004)
4. The amendments are not in compliance with 37 CFR 1.1		ompliant Amendment	t (PTOL-324).
<ul> <li>5. Applicant's reply has overcome the following rejection(s</li> <li>6. Newly proposed or amended claim(s) would be a the non-allowable claim(s).</li> </ul>		, timely filed amendm	nent canceling
7. For purposes of appeal, the proposed amendment(s): a)  -how the new or amended claims would be rejected is pro	will not be entered, or b) - w	vill-be-entered and an	explanation of
The status of the claim(s) is (or will be) as follows:  Claim(s) allowed:  Claim(s) objected to:  Claim(s) rejected: 1-20.  Claim(s) withdrawn from consideration:			
<ul> <li>AFFIDAVIT OR OTHER EVIDENCE</li> <li>The affidavit or other evidence filed after a final action, b because applicant failed to provide a showing of good ar</li> </ul>			
and was not earlier presented. See 37 CFR 1.116(e).	•		
9. The affidavit or other evidence filed after the date of filing entered because the affidavit or other evidence failed to a showing a good and sufficient reasons why it is necessar	overcome <u>all</u> rejections under appe ry and was not earlier presented. S	al and/or appellant fa See 37 CFR 41.33(d)(	ils to provide a (1).
10. ☐ The affidavit or other evidence is entered. An explanation REQUEST FOR RECONSIDERATION/OTHER	on or the status of the claims after (	entry is below or attac	Jileu.
11. The request for reconsideration has been considered by See Continuation Sheet.	ut does NOT place the application i	in condition for allowa	ance because:
12. Note the attached Information Disclosure Statement(s).	(PTO/SB/08 or PTO-1449) Paper	No(s)	
13. Other:			

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the art on record fails to teach attaching a data item to said encrypted control component, said data item indicating that said program has been copied and encrypting said encrypted control component and said data item to generate a nested control component. Examiner disagrees. As discussed in the last office action. Park (US Patent 5,689,559) teaches a method for copying having a scrambled program content component and a control component (see for example; abstract and col 3 ln 61 col 4 ln 8) comprising; receiving, in a recording apparatus, said program (see for example; col 3 ln 61 67); attaching a data item to said control component (see for example; col 3 ln 61 col 4 ln Band fig 3), said data item indicating that said program has been copied (see for example; col 3 ln 25 36). The data item (CP information) contains a field indicating the current generation of the copy, thus indicating that the program has been copied. Park further discloses encrypting said data item and control component (see for example; col 4 ln 1 8). Furthermore, Park '826 (US Patent 5,796,826) teaches a method for copy programming having a scrambled program content component [col 2, ln 48-49] and an encrypted control component [col 2, ln 50-53] including said encrypted control component [for example encrypted output of fig 7, unit 11 m G] and a data item [see for example additional information W(i), fig 7] encrypted to generate a nested control component [fig 7, unit 13, output d(i), col 6 ln 53-67 and col 4, ln 46 - col 5, ln 17]. Examiner asserts that the cited prior art teaches the claimed limitations, therefore the rejection is respectfully maintained.
